Online Security Announcement System

Public Address System or PA system is an important component for any organization. It's main purpose is for public announcement, back ground music and the most important is for emergency evacuation and Security Purpose.

The PA system should not confuse with the sound system as the sound system are for live music, whereas PA system are reproduction of recorded music and speech in buildings and institutions.

Abhishek & Denagi Management System

Devasthan receive various types of Denagi from the devotees. These denagi's are in the form of Money & In-kind. Our software can keep track of the Devotees with their personal information. This will also help Sansthan in maintaining the customer database which can be used to communicate them on the special occasions.
The computerized receipt can be generated and issued to the devotees on the receipt of Abhishek or Denagi.

Shashwat Pooja Management System

The System is basically used for keeping track of devotee's who had registered themselves for Shashwat Pooja. The Shashwat Pooja is of Different type viz., Special Days, all important days. The Shashwat registration is of various types like lifetime, 12 years, 15 years etc. The Software will give you various reports such as
- Daily/Monthly/Yearly Registered Devotee's
- Daily Shashwat Pooja Devotee's

Devasthan Store Management System

Many time Devasthan receives the denagi's in the form of material like Gold, Silver, and Grain etc. The item receipt and issue record is kept in the system for the future reference. Computerized receipts can be generated using the system.
- Stock Maintenance for various items received from devotees.
- Item wise details and their stock statement
- Item wise report with their usage details.
- Customized Reports

Devasthan Staff Payroll Management System

Payroll Software is packed with time and money saving features. With our Payroll software you can quickly take in-house control of payroll.
The design of Payroll software was directed by the feedback of its users. This means you'll quickly discover Payroll software works just as you and your accounting staffs do. Multi-state taxes, Multi-location taxes, Arrears computation, bonus, mass changes and many more are all handled with the touch of a mouse.
